DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1, 2, 4-6, 9-10, 12 are rejected under 35 U.S.C. 102(e) as being anticipated by US patent #6,327,420 (Furukawa).

- As for claims 1, 5, 9: Furukawa teaches a computer implemented method and corresponding system for browsing video data, the data being organized in a hierarchy of keyframe levels (figures 2-8), each level corresponds to a different level of details in a parent-children relationship. The user interacts with the hierarchy to visualize different level of information associated with a selected keyframe (3:54 – 4:50). In a parent magnification mode, a first keyframe

“Disc1/Clip1” and other keyframes associated with the parent level are displayed (figure 3). In a parent-child mode, the first keyframe ‘Disc1/Clip1’ of the parent level and other keyframes associated with the child level are displayed (figure 4).

- As for claims 2, 6, 10: Each keyframe includes an area 21 adjacent to the keyframe (figure 2).
- As for claims 4, 12: Each keyframe comprises image data.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 7, 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over US patent #6,327,420 (Furukawa).

- As for claims 7, 8: Fukurawa fails to teach the radial orientation of the hierarchy level representation, however implementation of a radial menu is well known in the art of menu interface (see the cited references). It would have been obvious to one of skill in the art, at the time the invention was made, to combine the well known implementation of radial menu to Fukurawa for displaying the representation of the video level hierarchy. Motivation of the implementation is for reducing cursor movement. The radial menu automatically adjustable to linearly translate the menu hierarchy thereby effecting a change in the radial orientation of the menus (see for example, US patent ‘987 and ‘837).

Allowable Subject Matter

3. Claims 3 and 11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: Claims 3 and 11, when considered as a whole, are allowable over the prior art of record. Specifically, prior art of record fail to clearly teach or suggest the displaying of the keyframes with different time intervals as recited in claims 3 and 11.
